

Letter of Recommendation for Dean Gladish.

Dear Sir / Ma'am,

I am the cofounder of Qooley, which is a corporate events marketplace startup, founded in December 2016. I am writing regarding my support for the candidature of Dean Gladish for the Masters in Computer Science program at your reputed institution. At Qooley, we curate event experiences by offering services such as venues, artists, hosts, and speakers. Hiring Dean as the Lead Web App Developer has been one of the best decisions I have ever made. Dean has been an extremely crucial member of our team since November 2020. He is 90% responsible for the development and ongoing maintenance of our current React-based website. I think Dean has a bright future because of his aptitude for learning new skills, adaptability, and agility. Above all else, he is sincere, reliable, and someone you can count on.

Over the past year and half, Dean has worked on most of the core functionality around our website. He demonstrated his ability to learn quickly by taking on challenging problems and relentlessly working on them until he had a solution. He started out mainly focusing on the front-end and usability aspects of the website, but quickly became proficient with the website's back-end code as well, and then soon became the sole developer on our team. This meant that he had a lot more responsibility and a lot of our company's progress was dependent on him. He took on the responsibility with utmost professionalism, grace, and enthusiasm. Since then, he has consistently demonstrated a progressive improvement in his skills and an unwavering passion for coding and web development. I am thoroughly impressed by Dean's enthusiasm and passion for his work. Whenever he is assigned a new task, he always accepts with his eyes lit up and a big smile on his face. Furthermore, he has demonstrated excellent communication skills and reliability during his tenure at Qooley. I would highly recommend him for a placement into your program for further developing his skills set.

Qooley just wouldn't be the same without Dean. He is very eager to learn, easy to work with, and exudes passion and inspiration. From building out the artist cards, price filtering menus, photo galleries, and artist profile pages, to rebuilding and debugging the back-end, Dean has fulfilled every task assigned to him with extreme enthusiasm. He has truly been an invaluable asset for our website and our online presence. Dean deserves all the praise and recognition possible and I would like to do anything I can to help him pursue higher studies and other opportunities. Once again, I strongly recommend him for admission at your institution for graduate studies in Computer Science. Kindly reach out to me if you have any further questions or inquiries.

Sincerely,

Kanishka Desai
Co-Founder at Qooley
